Case Study – Kenra Professional / Henkel

Problem

When stylists are behind the chair and mixing color formulations, it is incredibly messy to look up traditional paper mixing instructions. Also, it is challenging for new stylists, who are just learning the color line, to remember all the color conversion formulations they need.

Opportunity

To offer hair stylists a natural, hands-free way to learn about Kenra Color and get instant usable information about color mixing using only their voice, so they can focus on delivering high-quality service.

Case Study – Kenra Professional / Henkel

Solution

The Kenra Color Skill provides stylists a valuable hands-free tool to assist them in the color conversation process providing information and help with application instructions, processing times, providing product knowledge and information, and offers interactive mixing instructions.

wheresthebeautynomad Wow 😲 this is such a smart idea

Kenra's Learnings

- Great for showing **innovation** for a brand in a stagnant non-digital industry.
- Focus on **recurring needs**, find reasons for clients to use the skill **more frequently**.
- **Keep it as simple** as possible, given stylists are very new to a voice-first platform.
